

Tylö CC 300 has an intuitive interface with all functions just a few click away.

Tylö control panel CC 300

Tylö control panel CC 300 replaces CC 100 and CC 200 and comes in two versions for sauna/steam bath or Tylarium. CC 300 is switchable to run between 1,0 and 24 hours and has a display that indicates temperature, humidity (CC 300T only), remaining operating time, day and time. In addition the CC 300 is equipped with a switch for lighting, Swedish/English instructions, and memory, security code and energy-saving stand-by functions. Thanks to the integral weekly timer, the CC 300 also offers optional automatic on/off operation and stand-by mode at preselected times on the days of your choice. The control panel can be operated from an external control point.

Size: 130 x 190 mm, depth 27 mm. Protection class: IP 24. Available from mid-April 2009.
