

The new VA and VB have surface treatment that prevents fingerprints and other stains.

## Upgraded steam generators.

The new VB steam generator has been reduced in size to be an even better solution for small and mid-sized steam rooms. The new VB steam generator is also convertible between 2.2, 4.5 or 6.6 kW. Tylo's new VA and VB steam generator has a surface treatment that prevents fingerprints and other stains. The new steam generators will replace the old ones, as they are gradually phased out.

The new VB comes in a smaller format but has the same fine characteristics as its precursor.

### Tylö VA

A powerful, fully automatic steam generator with a large water tank, which makes it ideal in public facilities. Requires connection to electricity and water supplies. Convertible 1-phase/3-phase. IP rating: IP45. Add your choice of control panel.

**Steam 6 VA** (Art. 6620 2020)  
Output 6 kW. Size 570 x 485 x 224 mm.

**Steam 9 VA** (Art. 6620 3020)  
Output 9 kW. Size 570 x 485 x 224 mm.

**Steam 12 VA** (Art. 6620 4020)  
Output 12 kW. Size 570 x 485 x 224 mm.

**Steam 18 VA** (Art. 6620 5020)  
Output 18 kW. Size 615 x 485 x 445 mm.

**Steam 24 VA** (Art. 6620 6020)  
Output 24 kW. Size 615 x 485 x 445 mm.

### Tylö Steam VB

A compact steam generator with the same high quality materials, functions and features as the VA, but with a smaller water tank to ensure rapid heating-up times in small and medium-sized private steam rooms. IP rating: IP23. Add your choice of control panel.

**Steam 2/4/6 VB** (Art. 6620 1830)  
Convertible between 2,2, 4,5 and 6,6 kW for connection to 1-phase, 2-phase or 3-phase. Size 445 x 415 x 130 mm.
